View complete patient health records using an Internet-connected device!

Hoag is pleased to offer **ProAccess** - a clinical application that gives your practice a single point of web-based access to acute and ambulatory patient information aggregated from Hoag's systems.

You can access ProAccess from any Internet-connected device. Simply power up your Internet browser and log in to the application to take advantage of:

A dynamic clinical inbox

Advanced patient search functionality

Complete, longitudinal patient records

1 Clinical Inbox

When you log in to ProAccess, you'll immediately be presented with your Clinical Inbox. **The Clinical Inbox displays new clinical results and reports** for your patients in real time. From the inbox, you can view, filter, sort, print results, and much more.

2 Patient Search

To view a complete, longitudinal health record for a patient in the Hoag community, you can perform a straightforward search based on the patient's name, date of birth, medical record number, or social security number. **You can refine your search, if needed, using demographic information.**

3 Patient Chart

ProAccess displays complete, longitudinal health records of patients in the Hoag community. The Patient Chart's intuitive, tabular layout makes it easy to locate information such as:

- Face sheets
- Lab and microbiology results
- Pathology reports
- Radiology results
- Medications
- Transcribed reports

With online access to the community patient health record – anytime, anywhere – you can spend less time searching for information and more time focusing on providing high-quality care.
